Subject: Re: YIRCOF '09 Yeditepe International Research Conference on Foresight Assessment

I would like to take this opportunity to thank the executive committee for their efforts to organize such an important event. As a PhD student I enjoyed the benefits of the conference very much, including having an idea of what foresight is and where countries around the world stand in the studies of futures and foresight.. The only suggestion I can make is to have this event every two years and that was also decided on the last day of the conference.

Best Regards,
Fatih Karaca
